## GENERAL TERMS OF SALE

05-02-2002

The terms of sale listed here below apply to all the orders accepted by Euresis s.r.l. (here below called simply Euresis).

These terms of sale have to be accepted by the customer completely and without any condition. If the customer requires some modifications, they have to be agreed and signed by Euresis s.r.l.

- 1. PRICE.** Prices are shown in Euro on our Price List. Real price takes in account the discount for quantities, and is shown in the Euresis offers. Any offer is considered valid for a period of 60 days, excepting different agreements.  
In any case the agreed price shall be shown on the customer order.
- 2. PAYMENT CONDITIONS.** Payments have to be done in Euro according to the agreed terms, specified in our offer and in the customer order. All goods related to a customer order remain Euresis sole and absolute property until such time the customer has completely paid the goods. All the costs related to the payments are in charge of the customer, excluding collection costs of our bank
- 3. DELIVERY.** The delivery of the goods is always 'free at works'. Transport costs are in charge of the customer. The goods always travel at consumer's risk, even when Euresis, as a service to the customer, attends to the goods forwarding. When Euresis attends to the goods forwarding and pays directly the carrier, the transport price will be specified and charged on the invoice to the customer.  
Euresis is not responsible for damages or loss of goods due to the carrier. Euresis can insure the goods transport, provided that the customer agrees to support the related cost (in the order of 0.3 % of the goods value): in this case the cost will be specified and charged on the invoice. Different approaches can be agreed with the customer.
- 4. PACKING.** The goods will be delivered properly packed, to support stress due to the transport. Packing type is accepted by the carrier, so eventual claims for damages due to transport have to be addressed exclusively to the carrier.
- 5. DELIVERY TERMS.** Euresis does any effort to delivery in time. But delivery terms are intended as indicative, being subjected to materials availability and to possible causes beyond control. Euresis shall be never responsible for any damage, direct or indirect, caused by deliveries not in time, independently from any reason. Incidental delivery delay cannot justify order cancellation.
- 6. WARRANTY.** Warranty is intended for goods that appear defective under proper use within a period of 12 months (unless otherwise stated) after delivery, due to faulty materials or fabrication defects, and is related only to goods entirely paid.  
Euresis is not responsible for any inconvenient appearing on the customer product where the Euresis good is mounted. Euresis sole obligation is limited to the repair or replacement of the defective goods, provided that the defective goods are returned to Euresis, carriage

paid and suitably packaged. No goods may be returned for credit. Any tampering of goods by unauthorized people and any installation made without suiting what described in the Technical Specifications, results in the forfeiture of the warranty rights.

7. **RETURNED GOODS POLICY.** No goods may be returned without prior authorization of Euresis Customer Service or Representative. Incorrect or defective-in-warranty (as stated in point 6) products may be returned and, if justified, will be replaced or repaired. Euresis reserves the possibility to authorize the returning of out-of-warranty and/or damaged goods to evaluate their repair costs (if possible and convenient to Euresis to repair); the customer can then order the repair. Any carriage is paid by the customer. Euresis can only accept goods returned from the original purchaser and through the channel of distribution from which they were obtained.
8. Euresis reserves the right to bring to his products the changes that are considered useful to improve the product, without advising the customer. This doesn't allow the customer to cancel the order or to claim for damages, provided that the product is functionally and dimensionally compatible with the one before the changes.
9. Euresis is not responsible for damages in any way connected to his products, when these products are mounted on equipments produced by his customers. The purpose of a lock is to diminish as much as possible the risk for thefts and robberies, but cannot assure in an absolute way that these events can be completely avoided. So Euresis is not subjected to any civil or penal responsibility, direct or indirect, for damages to persons or things, connected to defective functionality of his products mounted on equipments of his customers.
10. For any controversy the competent court is the Tribunal of Ivrea (Italy).
